

Helensburgh Puzzle Trail

The Helensburgh Puzzle trail is a series of 36 caches found just off the road around Helensburgh, Stanwell Tops and Otford. It is roughly a 10 kilometre trip which makes for a nice cycling or walking trip.

All containers are placed at T2 or below. All containers are bison tubes, pill bottles, small containers and large containers.

By Bicycle

- Please do the trail **counter clockwise** as the containers will all be on your **left hand side** and you won't have to cross the road.
- Park your bike in a safe place. It's better to walk 20 meters back than to lose your bike.

By Foot

- Please do the trail **clockwise** so you can see the oncoming traffic. The containers will all be on your **right hand side**.

By Car

- **Do not park your vehicle in unsafe places!** From Stanwell Tops to Bald Hill there are limited parking opportunities at the entrances to the forest. From Bald Hill to Otford there are no parking spaces on the road. It's recommend that you park the car at Bald Hill or Otford and walk the other way.

Surrounds & Facilities

- There **limited or no phone reception** at the bottom of Otford. Make sure your geocaching app works without reception.
- The trail takes you over a normal asphalted road which travels through forested areas. You might see kangaroos - they will most likely run away from you; or snakes - they will most likely slither away; or spiders - whose web you most likely just ran into. If you need medical attention because of a bite, call 000.
- Helensburgh has a full set of shops and cafes.
- Bald Hill has a cafe, water taps and toilets.

Elevation profile

If you start at Helensburgh Cemetery and go counter clockwise, it will look like this:

The dip at 7.5 km is Otford. The dip at 5.5 km is Bald Hill. I couldn't cycle up from Otford, so I walked. I don't expect anybody to cycle that part.

As usual: Put the containers back the way you found them. If there are issues please do let me know via email (geocaching@mavetju.org) or via geocaching.com messages.

Puzzle 18: Puzzle IV

Puzzle 19: Words I

The worst thing which can happen is that the container is missing. Lots of time is spend on searching but nothing is found. I know the feeling, it's horrible. It should be there, but it cannot be found. Assume for now that it isn't really there. For etiquette you should log it as "not found", but if you are not the first to not find it you could also log it as "needs maintenance". (Overall I log every attempt to find a container, so my list of "not found" is very large). "Needs maintenance" is a way to tell the cache owner that there is something wrong.. After a timeout with no action from the cacher owner the local reviewer will archive the cache. Identical as the action from the reviewer, the cache owner can archive the cache themselves. Owners can apply afterwards for a cache to be unarchived, but that can only be done by reviewers. Common knowledge on to prevent disappointments is to make sure that the list of caches in your location device is up to date! Geo-based games can be fun, but keep in mind that about 10% of the caches will be missing.
